

## Technical sheet (03/06/2021)

### Permas® D

#### IDENTITY

INSECTICIDE PT18

Dusting powder against crawling insects and wasp nests

Approval number: Belgium: 2683/B, G.H.Lux 168/14/L

Dusting powder (DP)

Guaranteed composition: Permethrin - Perméthrine (CAS 52645-53-1) 0,75%

TEL Antidote Center: +32 (0)70 245 245

Authorization holder: Pelsis Belgium NV - Industrieweg 15 - 2880 Bornem - Belgium

Phone : +32 (0)3 886 22 11

#### USAGE

PERMAS®-D is an insecticide dusting powder with long persistence for the control of crawling insects in living, working and accommodation areas. PERMAS®-D is especially suitable for local application against ants and wasp nests in and around the house.

PERMAS®-D is ready for use and cannot be mixed with water.

## USAGE INSTRUCTIONS

### Against wasp nests

Dose: 50 - 100 g/nest when using a DR-5 powder sprayer.

Application time: as soon as nests are detected.

Method of application: preferably spray the powder directly into the entrance of the nest using a bellows or the DR-5 powder sprayer. Always treat all access routes to the nest.

Note: the complete clearing of a nest can take up to 24 hours.

### Against ants and other crawling insects

Application timing: as soon as the insects are detected. If necessary, and especially after rain, repeat the treatment.

Method of application: Preferably with a bellows or the DR 5 powder sprayer, spray the powder in thin layers on the places visited by the insects. For ants, especially sprinkle a little powder in the nest entrances (e.g. in cracks between tiles) and on the walkways.

### Other indications

Wash hands after application. Do not use in areas where children under 2 years of age reside. Cover foodstuffs, intended raw materials and kitchen utensils during handling. Do not apply in or on equipment for food or beverage processing or preparation. In view of the high aquatic toxicity of permethrin the preparation should not be used in the vicinity of aquatic environments. Wear protective clothing, gloves and dust mask when filling the spreading equipment and during application. When spreading above face height wear protective headgear and face mask. Dispose of this substance and its packaging as hazardous waste.

## Storage

Store in a cool and dry place. Store in the original packaging.

Shelf life: prod. dat.+2 years. see packaging

## Packaging

- Bag of 5kg

## Intended for

This packaging is intended for professional use and fire departments only
